

FLOTXTRA

SOIL PROTECTION

- Rounded tread lug edges ensure optimal protection of crop areas
- Wide tread lugs result in lower soil compaction
- Stiff tread design ensures even pressure distribution and a stable footprint.

LATERAL STABILITY

- Special tread block design ensures excellent lateral grip
- Multi-oriented tread block faces ensure excellent self-cleaning properties.

DURABILITY & MILEAGE

- Full-steel construction for excellent durability and damage resistance
- Advanced rubber compound construction ensures excellent mileage performance.

SAFETY

- Limited stone and mud retention due to an advanced tread geometry design
- Excellent directional stability caused by the nearly continuous central rib.
